PROFESSIONAL SUMMARY

Senior Pega Consultant and Certified Senior System Architect (CSSA) with 6.8 years of experience architecting, developing, and deploying enterprise-grade Pega applications across Banking, Healthcare, and Telecom domains. Hands-on experiences in Pega Constellation architecture and traditional PRPC, specializing in case management, workflow orchestration, decisioning, background processing and integration. Demonstrated a proven track record of improving application quality by reducing defects by approx. 30% through guardrail compliance, while ensuring timely project delivery using Agile methodologies.

TECHNICAL SKILLS & COMPETENCIES

Pega expertise:	Pega Constellation UI Architecture, PRPC (8.x), Case Management, Data Pages, Activities, Data Transforms, Flow Rules, SLA, UI, Declaratives, Integrations (REST, SOAP, File, Email), Queue Processors, Job Schedulers, Report Definitions, Data flow & Data set
Constellation & UI:	Constellation Views, Fields, Data Objects, Forms, Localization, portals and Attachments
Monitoring & Debugging:	Pega Diagnostic Center (PDC), Dynatrace, Tracer, Clipboard, PAL, Performance Profiling
Domain Expertise:	Banking, Healthcare & Telecom domain
Methodologies & Tools:	Agile/Scrum methodology, JIRA, Pega platform, Postman, Kafka, Confluence, PDC & Dynatrace
Pega Frameworks:	Constellation Architecture, Pega Smart Dispute and Customer Service Framework

PROFESSIONAL EXPERIENCE

Senior Associate Consultant | Infosys Limited, Pune

Citi — PI Pre-Clearance Questionnaire Portal

(March 2026 to Present)

This is Pega constellation-based application developed to digitize the compliance pre-clearance process for prospective payment intermediary and VASP clients before a formal proposal could be issued.

Role and Responsibilities:

- Configured and enhanced Constellation-based user interfaces using Views, Data object, Forms and user-facing portals.
- Implemented UI logic including cascading dropdowns, field validation, CRUD operations and localization based on business requirements.
- Built reusable and responsive Constellation components, improving maintainability and user experience.

Telenet — Customer Service & Operations Platform

(July 2024 to March 2026)

This application is designed to streamline customer interactions and service operations. Where customers can raise requests like new connections, SIM upgrades & order cancellations.

Role and Responsibilities:

- Delivered configurable business solutions by implementing workflow automation, flow actions, SLA rules and data pages to improve agent experience and resolution consistency.

- Monitored enterprise production environments using Pega Diagnostic Center (PDC) and Dynatrace, proactively resolving emerging bottlenecks and reducing incident volume by approx. 30%.
- Handled technical documentation, knowledge transfer and mentoring junior developers on Pega best practices and application development.
- Performed root-cause analysis on critical production issues using Tracer, Clipboard, and Job/listeners monitoring.

Associate Consultant | Infosys Limited, Pune

Bank of America — Fraud & Non-Fraud Claims Dispute Management

(Nov 2022 to July 2024)

This is Pega smart dispute framework application used for processing fraud and non-fraud claims/disputes for Mastercard and Visa card customers.

Role and Responsibilities:

- Customized and enhanced the Pega Smart Dispute Framework for dispute and chargeback management processes.
- Worked on Pega application modernization and upgrade activity with hands-on experience in migrating standard agent to queue processors to increase performance.
- Hands-on experience with REST and SOAP integration, data pages and Job scheduler.
- Enhanced Pega application performance and quality through report definition optimization, Data pages, Data transform and validation rules resulting in an approx. 25% reduction in guardrail warnings and application defects.
- Performed application debugging and root cause analysis using Pega tools including Tracer, Clipboard, Live UI, and PAL

Pega Developer | Cognizant Technology Solution, Pune

Molina Healthcare — Appeals & Grievance (A&G) States Rollout

(Jan 2020 to Oct 2022)

A healthcare application that provides many types of services like raising requests or complaints regarding quality of treatment and financial issues.

Role and Responsibilities:

- Designed and configured an end-to-end user story development for Molina project, including data modeling, process flow design and validation rule implementation
- Configured Email Listeners and Service Packages to automate case creation from incoming emails, improving operational efficiency and reducing manual intervention.
- Configured case routing, SLAs, Report Definitions, Data Pages, decision tables, sections and activities to process requests.
- Performed unit testing, code deployment, and environment migration activities, collaborating with QA teams to resolve defects and delivering high-quality releases within SLA targets.
- Collaborated with business analysts and stakeholders to gather requirements, analyze business processes, and deliver scalable Pega solutions aligned with business objectives.

CERTIFICATIONS & EDUCATION

Pega Certifications:

- Certified Senior System Architect (**CSSA**)
- Certified System Architect (**CSA**)

Bachelor of Engineering (B.E.) Mechanical Engineering

Sinhgad College of Engineering, Pune
