PIPPADIPALLI RAGHUVEER

HYDERABAD, INDIA | **8008437585** | p.raghuveer125@gmail.com

www.linkedin.com/in/raghuveer-pippadipalli/

Results-driven **Java Developer** with **5+ years** of IT experience in designing, developing, and maintaining scalable enterprise applications. Proficient in **Java, Spring Boot, Spring MVC, Hibernate, JPA, Microservices, RESTful APIs, SQL, MySQL, PostgreSQL, Groovy**, and Grails. Experienced in developing secure backend systems with Authentication, Authorization, Microsoft Sign-In, User Lifecycle Management, Subscription & Payment Management, Approval Workflows, Logging, Helpdesk Ticketing, and Announcement Modules. Skilled in **JavaScript, HTML, CSS, API Integration, Swagger, Postman, JUnit, TestNG, Apache Kafka, Redis, Git, GitHub, Azure Repos, Maven, Jira**, **IntelliJ IDEA, VS Code, GitHub Copilot, and Claude AI**. Strong expertise in **Agile Scrum methodologies, SDLC, Database Design**, Query Optimization, Performance Tuning, and Enterprise Application Development. Adept at building scalable, secure, and high-performance applications while collaborating with cross-functional teams to deliver quality software solutions.

Experience

- **JAVA DEVELOPER** | HCLTECH | JUNE 2021 – PRESENT

Skills & Expertise

- Java 17 / Java 21
- Spring Boot
- Microservices Architecture
- RESTful APIs
- Spring Security & JWT
- Hibernate & JPA
- MySQL
- PostgreSQL
- Redis
- Apache Kafka
- Docker
- Kubernetes
- Azure Cloud
- CI/CD Pipelines
- GitHub Actions
- Maven & Gradle
- Git & GitHub
- System Design
- Distributed Systems
- Event-Driven Architecture
- API Design & Integration
- Swagger
- Unit Testing (JUnit, Mockito)
- Agile Scrum Methodology
- Performance Optimization & Query Tuning
- GitHub Copilot
- Data Structure & Algorithms

Projects

MCT Application (Microsoft certified trainer)

Developed a scalable enterprise-grade MCT platform with Admin and User domains to streamline user lifecycle management, registration, onboarding, approval workflows, subscription handling, and payment management processes. Designed and developed secure backend services using **Java**, **Spring Boot**, **Hibernate**, **JPA**, and **SQL**, ensuring high performance, maintainability, and data integrity. Implemented **Microsoft Sign-In Authentication**, **Authorization**, and identity management mechanisms to provide secure user access. Built **RESTful APIs** for seamless frontend-backend integration and efficient data exchange. Developed logging, helpdesk ticketing, and announcement modules to enhance operational visibility, user support, and communication. Optimized database interactions using **MySQL**, **PostgreSQL**, and **JPA** for improved application performance. Utilized **Git** for version control, **Maven** for build management, **Swagger** and **Postman** for API documentation and testing, and worked in

Agile Scrum environments using **Jira** to deliver scalable, secure, and business-critical enterprise solutions while following SDLC best practices.
Tech Stack: - Java, Spring Boot, Spring MVC, Hibernate, JPA, REST APIs, SQL, MySQL, PostgreSQL, Microsoft Sign-In, Authentication, Authorization, Git, Maven, Swagger, Postman, Jira, Agile Scrum, IntelliJ IDEA

PTP Application (Pearson test preparation)

Developed and maintained a comprehensive Partner Training Platform supporting Admin and User domains across multiple business modules. Designed and implemented the Training Finder module, enabling users to discover training programs, partner offerings, and learning resources efficiently. Built secure backend services using **Java**, **Spring Boot**, **Hibernate**, **JPA**, **SQL**, and implemented **Authentication** and **Authorization** mechanisms to ensure secure access control and data protection. Developed scalable **RESTful APIs** for seamless integration between frontend and backend systems, improving application responsiveness and maintainability. Implemented logging, helpdesk ticketing, announcement management, and workflow functionalities to enhance system traceability, user engagement, and operational efficiency. Optimized database operations using **MySQL**, **PostgreSQL**, and **JPA** for improved performance. Leveraged **Git**, **Maven**, **Swagger**, **Postman**, **Jira**, and **Agile Scrum** methodologies throughout the SDLC to deliver reliable, scalable, and high-quality enterprise applications while collaborating with cross-functional teams.
Tech Stack: - Java, Spring Boot, Spring Security, Hibernate, JPA, REST APIs, SQL, MySQL, PostgreSQL, JavaScript, HTML, CSS, Git, Maven, Swagger, Postman, Jira, Agile Scrum, IntelliJ IDEA, VS Code, GitHub Copilot, Claude AI

Roles & Responsibilities

- Developed and maintained scalable enterprise applications using **Java**, **Spring Boot**, **Spring MVC**, **Hibernate**, **JPA**, **Groovy**, and **Grails**, ensuring high performance and reliability.
- Designed, developed, and consumed **RESTful APIs** for seamless integration between frontend and backend systems while following API development best practices.
- Implemented secure **Authentication** and **Authorization** mechanisms, including **Microsoft Sign-In**, user access management, approval workflows, and identity management.
- Developed business-critical modules such as **User Lifecycle Management**, **Training Finder**, **Subscription Management**, **Payment Management**, Helpdesk Ticketing, Logging, and Announcement Management systems.
- Designed and optimized database solutions using **MySQL**, **PostgreSQL**, and **SQL**, including query optimization, indexing, data modeling, and performance tuning.
- Built scalable backend services using **Spring Boot**, **JPA**, and **Hibernate**, ensuring maintainable and reusable application architecture.
- Utilized **Apache Kafka** and **Redis** for messaging, event-driven communication, caching, and performance optimization, while leveraging **Swagger**, **Postman**, **JUnit**, and **TestNG** for API documentation, testing, validation, and ensuring application quality, reliability, and scalability.
- Collaborated with frontend teams to integrate applications developed using Angular, **JavaScript**, **HTML**, and **CSS**, delivering responsive and user-friendly solutions.
- Managed source code, branching strategies, code reviews, and release activities using **Git**, **GitHub**, and **Azure Repos**, while leveraging **Maven** for build and dependency management.
- Worked in **Agile Scrum** environments, actively participating in sprint planning, daily stand-ups, retrospectives, estimation sessions, and defect resolution using **Jira**.
- Utilized modern development tools including **IntelliJ IDEA**, **VS Code**, **GitHub Copilot**, and **Claude AI** to improve developer productivity, accelerate development cycles, and deliver high-quality enterprise software solutions throughout the **SDLC**.

Education

- **B-TECH |** BV Raju Institute of Technology | 2014 - 2018
