Shadhu Yadav

Contact: shadhu.java@gmail.com | +91 7795772644

Summary

Dynamic **Principal Software Engineer** with **12+ years of experience** designing and delivering **scalable, low-latency microservices and cloud-native applications**. Strong expertise in **Java (8, 17, 21), Spring Boot, Kafka, AWS, Camunda (BPMN/DMN), JPA, multithreading, concurrency, and deadlock prevention strategies**.

Hands-on experience designing **custom thread pools** using **ExecutorService and CompletableFuture** for asynchronous processing, and optimizing **parallel streams in Java 21**. Proven ability to build **distributed systems**, optimize performance, and drive **end-to-end SDLC**, including **architecture (HLD/LLD)** and **database migrations**.

Implemented **DLQ handling, idempotency, schema evolution, and distributed tracing** to ensure reliability and observability in event-driven systems. Strong background in **system design, data structures & algorithms (DSA)**, and scalable backend architecture.

Technical Skills

Languages: Java 8, 17, 21

Frameworks & Libraries: Spring Boot, Spring Security, Spring Data JPA, Spring Cloud, Spring WebFlux, Hibernate, Kafka, Apache Camel, Cucumber, Camunda 8, Angular, React

Cloud Platforms: AWS

Databases: MySQL, Oracle (11g, 12c), PostgreSQL, DynamoDB, MongoDB, Aerospike

Tools & Methodologies: Microservices Architecture, RESTful APIs, CI/CD, Docker, Git, Agile, Code Reviews, High-Level Design (HLD), Low-Level Design (LLD), Data Structures & Algorithms (DSA)

Professional Experience

Symplr -Contract -6months (Payroll :Collabera) | Principal Engineer | March 2026 - Present

- Developed enterprise healthcare workforce management solutions for Symplr's Smart Square platform using Java, Groovy,Camunda BPMN/DMN , React.js, and AWS. Built REST APIs, enhanced workforce scheduling modules, integrated external healthcare systems, resolved production issues, and collaborated in Agile teams to deliver scalable, cloud-based applications.

Wissen Technology | Principal Engineer | Aug 2025 - Jan 2026

- I led and contributed to AI-driven platform initiatives, focusing on integrating LLM-based capabilities into backend systems
- Designed and implemented AI integrations using LangChain, LangGraph, RAG architectures, Vector Databases, and LLMs, supported by internal certifications and hands-on prototypesE

Globallogic | **Consultant | Apr 2021 – 26th June 2025 (4.3 years)**

- Engineered **scalable Java Spring Boot microservices and RESTful APIs**, enhancing core business logic and integrating critical business functionalities.
- Secured applications using **Spring Security and AWS services**, implementing robust authentication and authorization mechanisms.
- Optimized data persistence layers using **Spring Data JPA**, significantly improving performance and reliability.
- Monitored and tuned application health using **AWS CloudWatch**, proactively resolving production issues and improving system efficiency.
- **Led the migration of cloud applications from DynamoDB to Aerospike**, ensuring data consistency, backward compatibility, and zero-downtime migration.
- Designed and developed **service APIs** for user, project, role, and notification management.
- Designed and maintained **Kafka producers and consumers**, implementing **DLQ handling, idempotency, schema evolution, and tracing**.
- Worked on a **streaming platform**, designing and deploying **Camunda 8 BPMN workflows and DMN decision models**.
- Contributed to an **AI-powered internal developer tool** that accelerated development through automated **code-smell detection, refactoring suggestions, and JUnit test generation using LLMs**.
- Mentored team members and led **knowledge-transfer sessions**, improving team productivity and code quality.
- Developed **reactive, non-blocking REST APIs** using **Spring WebFlux**, enabling high-throughput request handling with backpressure support.
- Built **cloud-native microservices** using **Spring Cloud components** for centralized configuration, API gateway routing, service discovery, and resilient inter-service communication.
- Participated in evaluation of **GCP-managed database services** during a DynamoDB-to-GCP database migration assessment, focusing on data modeling, consistency, and scalability.
- Collaborated closely with QA teams to provide test data and actively participated in **production issue analysis and resolution**.

Technologies: Java 21, Spring Boot, Microservices, Spring Security, Spring Cloud Gateway, AWS, MySQL, React, Camunda BPMN/DMN, Kafka, Multithreading & Concurrency

---

Lumen Technologies | **Senior Software Engineer | Jun 2019 – Apr 2021 (1 year 11 months)**

- Developed and maintained **high-speed service qualification systems (Loop Qualification)** for DSL, GPON, and IP technologies, ensuring accurate service provisioning.
- Followed SDLC best practices, delivering **well-designed, testable code** and maintaining comprehensive technical documentation.

Technologies: Java, Spring Boot, REST Services, MySQL, Kafka, AWS, Microservices, Camunda BPMN/DMN, Multithreading

---

CWT (Payroll: Collabera), Makati, Philippines

Software Engineer | Jul 2018 – Apr 2019 (10 months)

- Contributed to the **Central Booking Repository (CBR)**, significantly reducing GDS read costs through automated data processing.
- Developed the **CBR Normalizer** to extract, standardize, and publish enriched booking data to **Apache Kafka**.
- Successfully upgraded **Oracle database from 11g to 12c**, improving performance and compatibility.

Technologies: Java, Spring Boot, REST Services, Oracle, Kafka, Camel, AWS, Microservices, React, Camunda BPMN/DMN

Deloitte (Payroll: Technosoft) | Consultant | Feb 2017 – Jun 2018 (1 year 5 months)

- Developed the **Senior Broker Oversight (SBO)** application for tracking agent qualification across multiple states.
- Integrated SBO with downstream systems to manage agent profiles and access to marketing materials.

Technologies: Java, Spring MVC, REST Services, Oracle, JavaScript, JQuery, AngularJS

Capgemini | Associate Consultant | Apr 2016 – Jan 2017 (10 months)

- Developed the **IPOS system**, automating store-level operations and daily POSLOG transfers.

Technologies: Java, Spring MVC, Oracle

Cruze Integrated Technologies | Software Engineer | Mar 2013 – Sep 2014 (1 year 7 months)

- Contributed to **AMES Cloud**, a framework for adaptive mobile video streaming and cloud-based social video sharing.
- Developed web applications focused on efficient video playback.

Technologies: Java, Spring MVC, Oracle, JavaScript, JQuery

Education

- **Sikkim Manipal University** — Bachelor of Computer Applications (BCA) | July 2009
- **Punjab Technical University** — Master of Computer Applications (MCA) | Nov 2013

ACHIEVEMENTS & PROFESSIONAL RECOGNITION

- **Performance Optimization (GlobalLogic): Received official appreciation for significantly reducing production response times.**
- **Critical Issue Resolution :** Awarded twice for identifying and resolving long-standing, complex production issues.
- **Technical Mentorship:** Consistently recognized for successfully onboarding and guiding junior resources and new team members.

ACHIEVEMENTS & PROFESSIONAL RECOGNITION

- **AWS Cloud Practitioner:** Completed comprehensive training; certification exam pending.
- **MongoDB with Java :** Advanced training completed
